

SG SERIES

GEARLESS MACHINES

Understanding the market,
anticipating its needs,
making them ours and
building our projects on them.

Driving the future

Sicor S.R.L., founded in 1981 in Rovereto (TN) as a manufacturer of lifting machines for elevators. Always focused on the application, thanks to a constant process of research and development, Sicor has developed over the years a complete range of products, geared and gearless machines, fit to satisfy the many and varied needs of the market.

Design and production are carried out according to a tested Quality System which guarantees the reliability and performance of the machines.

Each produced motor is subjected to a rigorous final test and quality checks are carried out on all the components.

The test tower allows the verification of machines in the real operating environment of the final customer allowing a perfect set-up.

An innovative online product configurator allows to quickly identify the appropriate traction unit based on the main specifications of the lift system.

SICOR has also certified its quality system, its health and safety management system and its environmental management system according to the most important international standards.

The market needs new answers and Sicor offers them through a new vision, made up of agility, innovation, customer involvement and service quality.

● Standard equipment. ○ Available. -- Not available.

- The Sicor gearless machines consist of: synchronous internal rotor motor with permanent magnets, the traction sheave, safety brake and encoder.
- Compliance with new Lift Directive 2014/33/EU, and with EN81-20, EN81-50.
- Series designed for MRL (compact and efficient) suitable for MR.
- Machines available both in traditional version (SG series) or with central traction sheave between the motor and brake (SGS series) for systems with cantilever arches and gauges guides and reduced headroom.
- Full range up to 3.500kg in 2:1.
- Speed up to 3 m/s (others on request).
- Wide range of traction sheaves (diameter 120 ... 600 mm) made of hardened steel (hardness > 50HRC) or ductile cast iron EN-GJS-700-2-UNI EN 1563 (hardness > 250HB) easy to be removed without any special tool, for all SG series.
- Slotted and adjustable nip guards
- Traction sheaves groove profile machined for optimum durability and/or according to customer specification.
- Brakes certified according to the new Lift Directive 2014/33/EU and EN81-20, EN81-50 as part of the protection system against overspeed for the car moving in upward direction and braking element against unintended car movement.
- Wide encoder range for the correct position and speed feedback for any inverter used. Encoder always positioned within the brake to prevent any type of damage and to ensure the maximum compactness the traction unit.
- "Retrofittable" ventilation kit to provide increased performance without changing the length of the traction unit.
- Wide range of motor power cables, brakes, accessories, encoder available.
- Motor cast iron case to ensure maximum strength, minimal noise and reduced vibration. Case always with fins to provide optimum heat dissipation.
- Wide metallic terminal box to ensure good grounding and easy connections.
- Side terminal box available on request for easier installation in reduced vertical height.
- Electromagnetic design optimized for maximum performance in minimum space.
- Use of only high-performance magnets (NdFeB) fixed to the rotor with the patented system to ensure the correct positioning/ maintaining the position throughout the operation/life cycle of the traction unit.
- Class F winding always equipped with thermistor for temperature monitoring during exercise. Production of fully automated winding.
- Product configurator available for selecting the right drive unit for the specific application.
- Several options already available.

The production range of Sicor gearless machines covers loads up to 3500 in roping 2:1, speeds of up to 4m/s (other speed on request) with traction sheaves 120 to 600mm. Since 2015, the gearless range has been implemented with central sheave machines to systems with cantilever arches and gauges guides and reduced headrooms. Numerous special versions and options are available on request.

Product range with central sheave **

Model		For rated loads up to	Car speed range in 2:1	Traction sheaves diameter range	Max Static Load
		[kg]	[m/s]	[mm]	[kN-kg]
SGS6C		800	0,15 ... 1,00	120(*), 160(*), 200, 210	19,6-2000

FIXING HOLES BEDPLATE

XTE2062 for: SG10, SG15, SG22, SG30, SG38.

XTE2062 for: SG40HF, SG48.

RANGE OF COMPATIBLE PULLEYS WITH THE FRAME

Diverting Pulley		Max n°grooves x D	Ø Ropes	Grooves Pitch l[mm]
D[mm]	E[mm]			
160	125	10	8	12
240	125			
320	125			

BEDPLATE - DIMENSIONS

MACHINE BEDPLATE CODES

XTE2062 (SG10/SG15/SG22/SG30/SG38/SG40HF/SG48)

The bedplate includes vibration dampers

Bedplate weight: 158 kg

INSTALLATION POSITION

Sicor S.R.L.

Viale Caproni, 32 Rovereto (TN) - Italy • Tel: +39 0464 484 111 • info@sicoritaly.com
